May 2009

Thanks for choosing disposable eye protection when indoor tanning! We believe that disposable eye protection offers you the cleanest and easiest choice in eye protection.

We created this product to meet the Food and Drug Administration's Good Manufacturing Practices (21 CFR 810) and the FDA's Sunlamp laws for Eye Protection (21 CFR 1040.20).

Wink-Ease and Viewkeepers meet the standards for a Class One Medical product, as do tongue depressors and cotton balls. Just like these products, you cannot re-use our disposable eye protection without compromising its cleanliness and sanitation. Please use our product only once and then dispose of it.

We appreciate you caring about your eyes to wear our adjustable and disposable eye protection when you are indoor tanning.

The Eye Pro Team

Makers of WINK•EASE®
and VIEWkeepers® disposable eyewear
and Fresh-Ease® refreshing body cloths for after tanning

CLEAN • EASY • DISPOSABLE
